

Transform your F55/F5 for news and documentaries.

CBK-55BK Shoulder Mount Dock for F55 and F5. No cables, and no tools necessary. Just slide the camera body into the dock and away you go.

Now with Sony's CBK-55BK Shoulder Mount Dock, your F55 or F5 quickly transforms into a run and gun ENG and Documentary camera whenever you need it, and returns to a traditional Super 35mm camera when that's what the job requires.

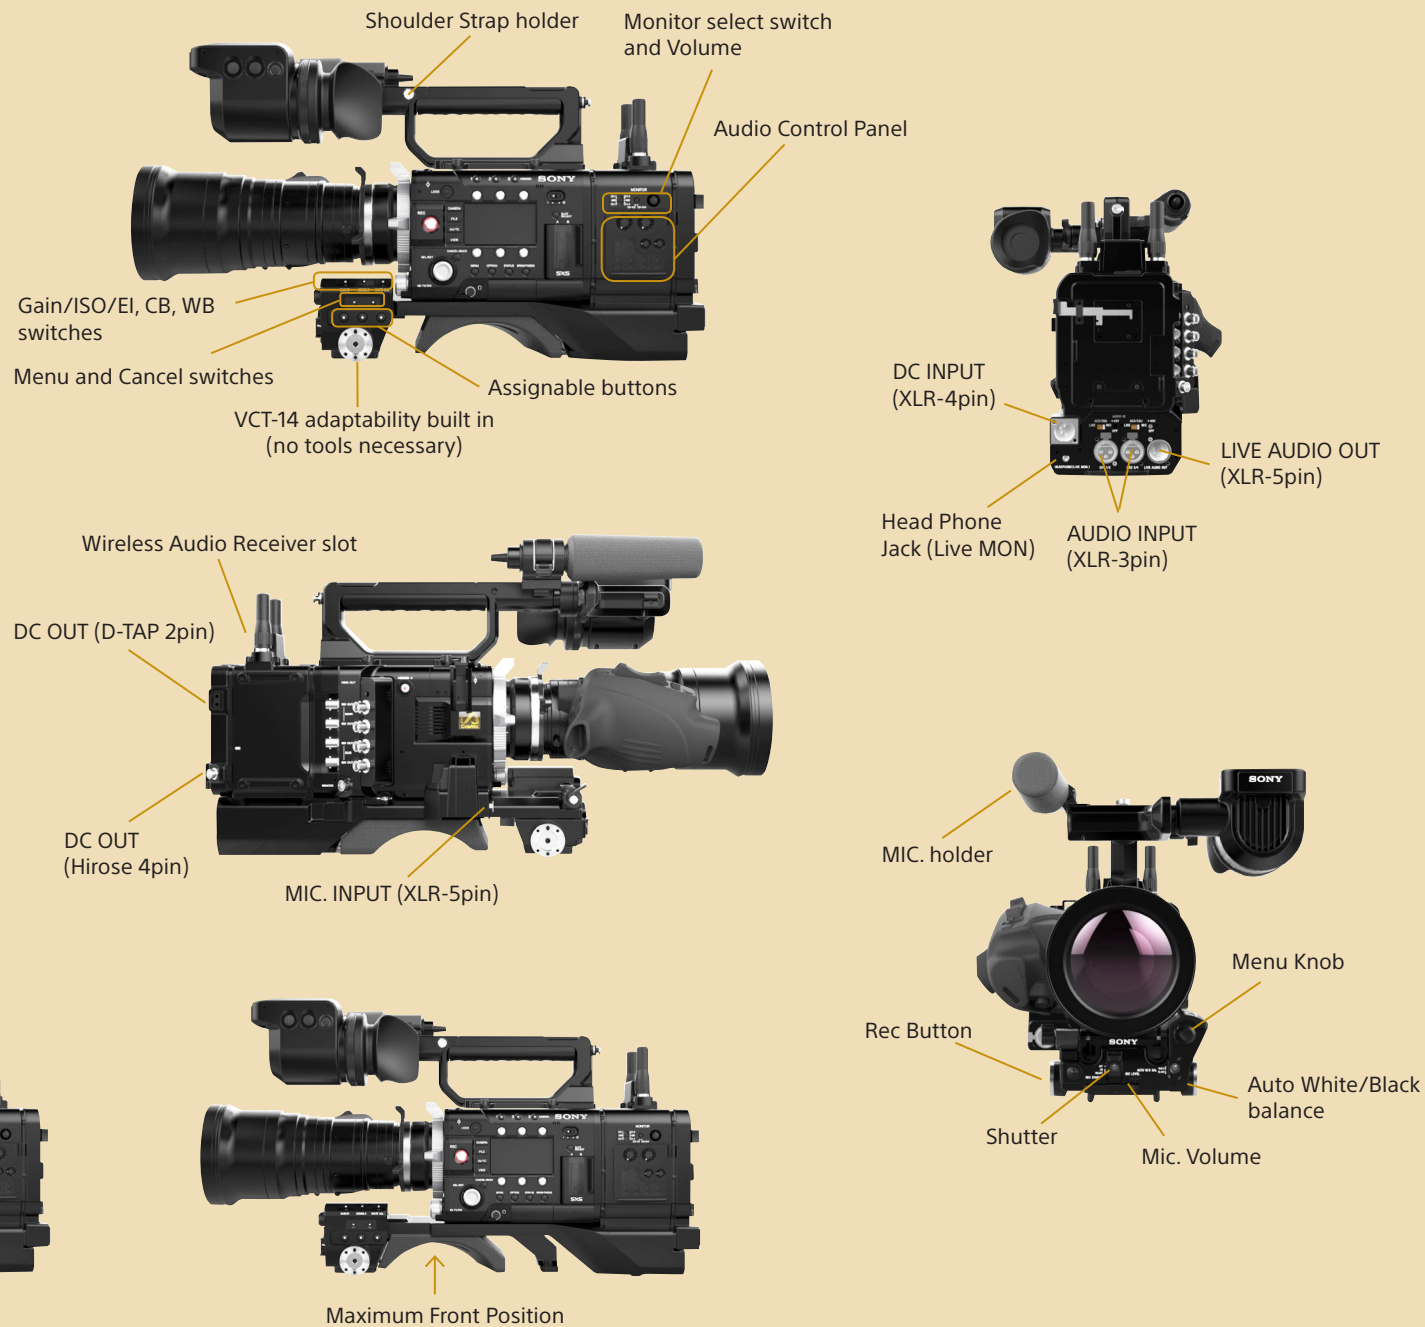

In combination with Sony B4 lens adaptors and Center Scan mode, the F55 and F5 deliver the same lens compatibility, along with the same angles of view, ergonomics, and operating comfort as Sony's iconic ENG camcorders.

Just slide the camera into the dock and suddenly White Balance, Gain and Shutter controls are right where muscle memory tells you they should be. Inputs and outputs, including balanced XLR audio, headphone monitoring and wireless audio receiver are exactly where you need them. The padded shoulder arch even adjusts fore and aft to balance perfectly with a large range of lenses, and with the VCT-14 adaptability built in, locks effortlessly onto the equipped tripod.

With the CBK-55BK, your Sony F55 and F5 can fulfill an even wider range of shooting assignments.
