The PIX-E monitors feature a compact, die-cast metal housing and an LCD display protected by Gorilla Glass 2, making them the ideal choice for cinematographers and videographers looking for a monitor that can stand up to the rigors of the most extreme and demanding production environments. PIX-E includes PIX-Assist™, an impressive suite of monitoring tools including TapZoom[™] for unrivaled focusing speed, false colors and zebras to help set exposure, guide markers for framing, LUTs and a range of scopes including waveform monitor, histogram and vectorscope. These new on-camera monitors incorporate a 'best-of-both-worlds' user interface that combines easy-to-access real tactile buttons and intuitive touch screen. And with their ability to record the highest quality Apple ProRes edit-ready video, the PIX-E recording monitors are an affordable, must-have tool for any video production professional.
