These models have been tested by Steadicam personnel and are compatible. There may be other models that will work. Some Camera Device manufacturers use different part and model numbers for the same product in different countries. Tiffen suggests you test your device for compatibility. The camera device will fit the Smoothee mount only as originally delivered by the Manufacturer. The addition of Skins, Covers and any other added attachment may prevent proper fit into the Smoothee device mount.

The Tiffen Company, 90 Oser Avenue, Hauppauge, NY 11788
