SONY

Media Navigator

Powerful, affordable asset management solution

Overview

Media asset management solutions enable you to organize, manage, protect, and share your valuable content.

Media Navigator is the powerful, affordable asset management solution from Sony that's a perfect fit for smaller and medium sized production environments.

Media Navigator orchestrates all phases of your content workflow – from ingest, catalogue and editing to review, approvals, distribution and archive.

Uniquely flexible and effortlessly scalable, it's ideal for single-seat users and larger workgroups alike. Better still, Media Navigator offers top-flight performance at a fraction the cost of other less capable Media Asset Management (MAM) solutions.
